#### **HURRICANE HARVEY MANAGEMENT REPORT**

*Information contained in this report reflects HQ and regional reporting from the most recently completed operational period as well as other reports provided by HQ, regional and interagency sources. The Senior Leadership Briefing and DHS Component Actions Reports are attached.*

#### National Incident Management Objectives

- Objective 1: Ensure that health and safety of the EPA response is considered at all times.
- Objective 2: Establish an incident management structure and processes employing the Incident Command System to enable effective overall management of the event with deployment of resources (staff and equipment) in a rapid, aggressive and well-coordinated manner.
- Objective 3: Ensure prompt Review and Processing of Fuel Waiver requests.
- Objective 4: Prepare for and provide Rapid Assessment of Industrial facilities as requested by the State or under EPA's statutory program responsibilities for CERCLA Superfund, RMP and FRP facilities. Working with our state partners, contact industrial sources within the impacted area to determine their operational status and determine what support can be provided with the monitoring of the start-up of industrial sources.
- Objective 5: Prepare for and provide Rapid Assessment & Technical Assistance Drinking Water & Wastewater facilities as requested by the State or local government. EPA will support our state partners in contacting drinking water and waste water systems.
- Objective 6: Prepare a Sustained Response Plan that outlines the resource and equipment needs for a long duration response.
- Objective 7: Activate the Agency's Crisis Communication Plan to insure effective and efficient coordination of all incident communications.
- Objective 8: Encourage a collaborative federalism approach, where national, state and local governments interact cooperatively and collectively to solve common problems.
- Objective 9: Begin Agency internal and external coordination, under the National Disaster Recovery Framework, regarding Recovery Support Functions in which EPA is likely to be involved.

#### **Executive Summary**

- EPA Region 6 (R6) Environmental Justice Director will visit the Alabama-Coushatta tribe on September 13<sup>th</sup>.
- Community Liaisons continue to assist impacted counties by providing information to residents on dealing with the environmental hazards of returning to flood damaged homes and obtaining their input about other challenges or concerns.
- EPA and the Texas Commission on Environmental Quality (TCEQ) met with environmental advocates in Austin on September 12<sup>th</sup>.
- EPA supported the Texas Water Development Board's requests for flexibility in using State Revolving Loan Funds to address hurricane damage and is committed to expedited reviews.
- EPA expects to complete sampling of the 34 Superfund sites in Texas potentially impacted by the storm by September 13<sup>th</sup> and have preliminary results by September 16<sup>th</sup>.
- EPA expects to complete sampling of the nine Superfund sites in Louisiana potentially impacted by the storm by September 15<sup>th</sup> and have preliminary results by September 18<sup>th</sup>.
- Discussions at the Joint Field Office (JFO) are now focusing on debris management operations. EPA is providing a debris management expert to the JFO at FEMA's request.

- Airborne Spectral Photometric Environmental Collection Technology (ASPECT) completed flight operations for the Hurricane Harvey response and demobilized. ASPECT surveyed a total of 134 Risk Management Program (RMP), 456 drinking water, and 105 waste water facilities.

#### Region 6 Significant Activities:

The R6 Region Emergency Operations Center (REOC) is currently activated and working under a limited Emergency Support Function (ESF) 10 FEMA Mission Assignment (MA). EPA has received MAs for over \$10.3 million for recovery operations to include assisting TX with drinking water, wastewater, and hazmat recovery operations. FEMA announced plans to fund mission assignments in five day increments.

#### Houston, TX:

On September 12<sup>th</sup>, EPA received a report from PCI Nitrogen (formerly Agrifos) in Pasadena that storm water run-off from Hurricane Harvey had caused a section of a retaining wall on the plant grounds to collapse. An Assessment Team will investigate the report on September 13<sup>th</sup>.

#### Beaumont, TX:

The Inland Task Force Hazard Evaluation Teams, Orphan Container Recovery Group and Oil Discharge Task Force conducted hazard assessments in Lumberton, Sour Lake, Port Arthur, Nederland, Sabine Pass, Beaumont, Bridge City, Beaumont Yacht Club, and Rose City. Orphan Container Recovery Teams identified targets in Port Arthur, South Orange, Lumberton, Bridge City, and Grove.

#### Corpus Christi, TX:

An Oil Discharge Assessment team monitored Signet Enterprise salvage operations. Oil Discharge Removal Teams coordinated and monitored responsible party clean-ups and prioritized threats to the environment for removal in Laguna Madre, Padre Island Canals, Flour Bluff Canals, White Cap, Corpus Christi Bay, Ingleside, Nueces Bay, Mustard Island, the city of Corpus Christi, Copano Bay, Lamar Peninsula, Rattlesnake Point, and Holiday Beach.

**Emergency Response:**

R6 continues to collect and stage recovered orphan containers. They anticipate completion in Corpus Christi, Houston, and Beaumont over the next 30 days.

**EPA Headquarters Significant Activities:**

The HQ EOC is activated to Level 1 in support of the Region 6 response to Harvey. The HQ EOC is coordinating with Region 6 and other Federal agencies. The HQ EOC has deployed personnel to the FEMA NRCC to staff the ESF-10 desk. EPA Senior Management that comprise the Policy Coordinating Committee (PCC) developed and issued senior management objectives that form the basis of field strategy and tactics in response to Harvey.

Superfund NPL Sites:

EPA provided oversight to potentially responsible parties (PRPs) and independently started collecting samples at 34 TX Superfund Sites and nine LA Sites to confirm no releases due to storm impacts. EPA teams, along with PRPs, completed sampling at 26 sites. R6 expects sampling in TX to be complete by September 13<sup>th</sup> and sampling in LA to be complete by September 15<sup>th</sup>. R6 also expects to have preliminary results for sites located in TX by September 16<sup>th</sup> and for the sites located in LA by September 18<sup>th</sup>.

All 43 Federal Superfund NPL Sites in the affected area have been assessed. Of these, 41 sites have been cleared, and two sites (San Jacinto Pits and US Oil) require additional follow-up.

- San Jacinto Waste Pits: Cap repairs continue on the remaining berm sections and samples were collected and sent for analyses. The Dive team assessed the armor cap and identified missing components. R6 is developing a sampling plan based on this assessment.
- US Oil: The PRP continues pump-down operations to maintain freeboard. Since the time the pump-down operations began, the PRP has removed approximately 290,000 gallons of storm water from the site. They are also removing sludge globules observed on the ground surface.

EPA Laboratory/Analytical Services:

Nothing significant to report.

Air Monitoring

The Trace Atmospheric Gas Analyzer (TAGA) mobile laboratory and air quality technical specialists monitored the neighborhoods adjacent to two industrial sources along Buffalo Bayou near Pasadena. TAGA terminated monitoring early due to unfavorable wind conditions. On September 13<sup>th</sup>, TAGA

will finish monitoring neighborhoods around four industrial sources in Galena Park.
